Pharmefex (Pharmefex.com) and the Cascadia Drug Development Group (CDDG; theCDDG.com) are pleased to announce the formation of a strategic partnership.

Pharmefex specializes in Chemistry, Manufacturing and Controls (CMC) and helps organizations to streamline process development, accelerate time to market, reduce cost of goods, manage technology transfers, prepare regulatory submissions, and prevent and resolve manufacturing and compliance problems for recombinant proteins, and cellular immunotherapy products. CDDG provides oversight of drug development from discovery to early clinical development and offers subject matter expertise in several key translational sciences through their network of vetted affiliates.

This partnership is based on shared values and standards of quality, and expands the scope of outstanding service CDDG and Pharmefex can provide their clients.
